

Pedestrian Safety Barrier

DDA compliant automatic door barriers for entrance doors.

Our barriers ensure pedestrian traffic approach automatic swing doors from a safe pre-determined direction. They are robust and heavy duty making them perfect for commercial application in shops, schools, offices, hospitals, pharmacist and much more.

They are supplied as standard in a 9006 matt silver finish and with the option to add toughened safety glass infills to comply with BS 7036.

All barriers are 900mm in height as standard, but come in varied lengths from 600mm to 1200mm.

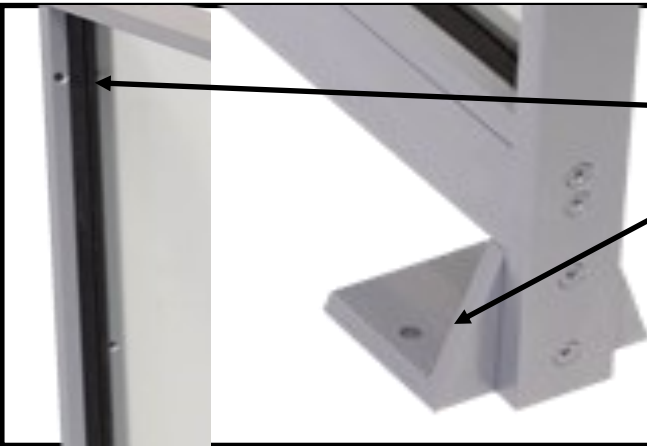

Please contact us for bespoke size options.

Wall to Floor

Floor to Floor

- 
- Easy to install.
 - Supplied with pre drilled holes ready to be secured to floor/wall of choice.
 - Angled footings can also be added if you need to fit the barrier on an uneven surface or slope for example.
