ACCESS-5K

## GENERAL CHARACTERISTICS OF ACCESS-5K

ACCESS-5K completes the ACCESS range with advanced features:

- . Local database allows access to the information of the installations.
- . Versatile power supply (12/24 Vac/dc): it can be powered by most of the control panels
- . Users management by time schedule
- . Schedules assignable to groups for each relay
- . 5000 users
- . Security against transmitter copies: Management of users only via Soft Assistant (version 6 minimum)
- . Wiegand26 / BUS-L inputs
- . Firmware update

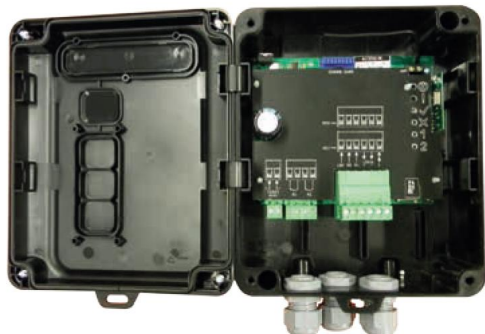

- . Optional remote management in real time via GSM-CARD with M2M service:

- Including unsubscriptions
- Save time and money by avoiding the trip to the installation

## ACCESS CONTROL

### ACCESS-5K

- 868 MHz access control, 2 relays, 5,000 codes.
- Outputs: 2 relays assignable to specific time slots per user or group of users.
- Micro SD extractable memory included.
- Power supply: 12/24V AC/DC, with a capacity for up to 2 proximity readers connected directly to the equipment.
- Recommended cable lengths: cable sections of 0.22/0.35/0.5 mm<sup>2</sup> to 100/150/200m respectively using CAT5 cable.
- Clock and calendar to store the time and date.
- IP65.
- Adding an additional power source will give you a capacity of up to 20 readers on the same network (BUS-L only).
- Front cover with hinges to prevent from falling if opened.
- Box size 152 x 180 x 85 mm.

#### Remote maintenance (optional)

GSM card allows the maintenance of the equipment from your office, saving you both time and travel expenses.

M2M service needed (available from JCM).

## APPLICATIONS

### Without GSM-CARD:

Access control for small installations from a front desk: main door of an office, gym, social club...

ACCESS-5K

## APPLICATIONS

### With GSM-CARD:

Installations with frequent updates: parking lots with changing renters, park-sharing...

In general, for providing an added value service in your maintenance / management contracts (immediate response of changes without transport cost): communities, turistic facilities...
