

## Wireless Vehicle Detection System

### Installation in 3 simple steps

1. Code in the e-Loop.
2. Core bore 89mm hole 70mm deep and secure using flexible mastic.
3. Calibrate the e-Loop... and you're ready to operate in less than 30 minutes.

**Save many hours of installation time compared to wired loop systems.**

IP68

### FEATURES

- Dual sensing technology. (EL00IG-RAD only).
- High security 128 bit encryption.
- Quick and easy installation.
- Recesses into the driveway.
- Not affected by ground movement.
- 14500 mA battery giving up to 10 years battery life.
- Top access for changing battery.
- Up to 50 metres range.

Introducing a new concept in wireless vehicle detection. The in-ground e-Loop replaces traditional wired inductive loops, saving time and money while increasing reliability.

### KIT CONTENTS

- 1 x e-Loop wireless in-ground module.
- 1 x single channel transceiver.
- 1 x magnet.
